

ENERGY  
CONSERVATION  
STARTS WITH **SMART  
CHOICES**

At Midwest Illumination and Millenium Energy Integration, we originate intelligent energy conservation solutions by way of innovative lighting and energy management systems. We optimize your facility's lighting, heating, and cooling equipment through solution design and engineering, as well as supply and installation. In turn, this creates results that are not only more efficient, but better for the world at large.

# SMART CHOICES

At Midwest Illumination and Millenium Energy Integration, we originate intelligent energy conservation solutions by way of innovative lighting and energy management systems. We optimize your facility's lighting, heating, and cooling equipment through solution design and engineering, as well as supply and installation. In turn, this creates results that are not only more efficient, but better for the world at large.

## SMART ENERGY

IMPROVING THE WAY WE USE ENERGY

Our energy consulting services and extensive design proficiency allow us to engineer lighting and energy management systems that will deliver on your conservation goals for your unique situation. In-depth knowledge and experience allow us to evaluate, optimize and improve your current energy usage—or accommodate new energy needs.

## WE CREATE SMART SOLUTIONS

Helping diminish your energy demands while maximizing performance is what we do best. Our goal is finding ways to reduce overall energy usage and cut costs. At the same time, we'll make sure you stay comfortable and operating at peak performance.

We've delivered measurable energy efficiency gains in a variety of markets:

- › Industrial
- › Commercial
- › Municipal
- › Institutional
- › Educational
- › Health Care

## SPECIALISTS IN TURN-KEY SERVICE

Midwest Illumination and Millenium Energy Integration will demonstrate how you can put the most cost effective, state-of-the-art systems to work for you. And rest assured, we're out to exceed your expectations when it comes to significantly impacting both energy savings and quality.

We'll achieve the right solutions for you with the following services:

### Assessment Surveys

Engineering studies are done on premises to identify energy efficiency opportunities.

### Cost Savings Analysis

Detailed audits are performed; a proposal is presented, detailing long-term savings, compliancy and EPAC tax savings qualifications.

### Custom Design & Engineering

A fully customized solution is designed using start-of-the-art software programs and incorporation of energy conversation measures.

### On-Site Project Supervision

If desired, we will provide a field superintendent to provide on-site supervision until the project is completed.

### Project Management

Project Management software will track every project from development through delivery. We will also provide a detailed scope of work documentation, room-by-room material specifications, project progress tracking, regulatory compliance and utility verification. It's time to achieve lighting and energy system improvements for a substantial return on your investment!

### Performance Contracting

Facilities upgrades may be paid for through a self-funded, performance-based contract. Savings generated from the improvements pay for the project cost. These savings can be guaranteed.

## WE CAN BRING YOU SMART TECHNOLOGY

Our technological knowledge has created efficiencies and savings for the following companies:

- › Siemens
- › Honeywell
- › Ford Motor Company
- › Whirlpool
- › Detroit Medical Center
- › Delphi
- › Providence Hospital
- › Detroit Metro Airport
- › Multiple State of Michigan buildings
- › Detroit and Grand Rapids Public Schools

Allow us to put our 14 years of know-how to work for you. There's no better way to have a positive impact on the environment, as well as your bottom line.
